Bright and clean – tooth cleaning made easy.
Professional prophylaxis – now your patients have a good reason to smile.

More and more patients realise the importance of regular prophylaxis, to achieve healthy teeth and a bright smile. But above all, patients want the treatment to be pleasant and gentle. Dentists offering a matching range of services often improve their patients’ loyalty and benefit from the long-term trend of preventative intervention.

Tooth cleaning is of particular importance for prevention of gingivitis, periodontitis and dental caries. The air-polishing unit PROPHYflex and the gentle cleaning agents, PROPHYpearls and PROPHYflex powder by KaVo make the treatment easy for you and gentle for your patients.

• Easy to use
• Pleasant treatment for your patients
• Optimal integration into your workflow

The cannula directs the powder jet perfectly for optimal cleaning.

The cannula is easy to remove for cleaning, disinfection and sterilisation.

The grip sleeve rotates a full 360° and makes your work easy in all quadrants even in places that are difficult to reach.

The KaVo PROPHYflex 3 can be washed and disinfected in a washer disinfector, and sterilised at 135°C in an autoclave.

Available with KaVo or Sirona connector.

The sealable powder reservoir made of high-quality industrial polymer is easy to remove, clean and dry prior to re-filling.

The Cannula is exchangeable for regulating the amount of powder.

Easy cleaning due to linear media guidance.

Easy cleaning saves time.
• Easily removable cannula
• Sterilise in an autoclave

High performance for perfect results.
• Easier and shorter treatments
• Excellent cleaning results even in areas that are difficult to reach
• Gripping sleeve, rotates 360°

Safety for both dentist and patients.
• Fully sterilisable and thermo-disinfectable (RKI guideline)

Easy and efficient treatment.
• Comfortably perform multiple prophylaxis sessions in a row
• Operation by foot control

Customised for your patients.
• The right powder for every patient
• Individualised dosing
• For sub- and supragingival use

Perio tip for subgingival treatments
• Removes bio-film in pockets
• Cleans implants
• For focused and gentle cleaning

KaVo PROPHYflex® 3 – 2018

The sealable powder reservoir made of high-quality industrial polymer is easy to remove, clean and dry prior to re-filling.

NEW!

The sealable powder reservoir made of high-quality industrial polymer is easy to remove, clean and dry prior to re-filling.

NEW!

Perio tip for subgingival treatments

NEW!
Pleasant and effective – intensive cleaning with pearls and powder.

A clean procedure every time.

KaVo offers three different cleaning agents for tooth cleaning. Simply choose from PROPHYpearls, PROPHYflex Powder and PROPHYflex Perio Powder. All three products produce first-class cleaning results – your patients will enjoy the before/after difference!

Easy and flexible – for numerous indications.

PROPHYflex® – unlimited applications.
The PROPHYflex is a popular product due to its versatile use in sub- and supragingival applications. It is ergonomically designed and the pressure can be controlled. This makes it well-suited for every type of patient.

In stain and plaque removal
- From tea and coffee
- From tobacco
- Bio-film removal
Your result with PROPHYflex:
Efficient prevention of gingivitis, periodontitis and dental caries

In orthodontics
- Band cleaning
- Preparation of surfaces before bonding
- Removal of adhesive residue
Your result with PROPHYflex:
Better treatment results, more satisfied patients

In periodontology
- Can be used with supra-alveolar pockets of up to 5 mm
- Efficient destruction of the bio-film
Your result with PROPHYflex:
Effective treatment of periodontitis and peri-implantitis

In prosthodontics
- Cleaning of healthy teeth to adapt them to the hue of bridges, crowns, inlays and onlays
Your result with PROPHYflex:
Easy and perfect adaptation of hue

In conservative dentistry
- Improved adhesion of composite and ceramic inlays and veneers
Your result with PROPHYflex:
Extending the longevity of composite/ceramic restorations

In prosthetics
- Cleaning of healthy teeth to adapt them to the hue of bridges, crowns, inlays and onlays
Your result with PROPHYflex:
Easy and perfect adaptation of hue

In fissure-sealing
- Cleaning of fissures before sealing
Your result with PROPHYflex:
A significantly reduced risk of dental caries for your patients

In aesthetic dentistry
- Tooth cleaning before bleaching for exact determination of natural tooth colour/hue
- Preparation of tooth tissue for optimum effectiveness of bleaching agent
Your result with PROPHYflex:
Optimised results of bleaching procedures

In orthodontics
- Band cleaning
- Preparation of surfaces before bonding
- Removal of adhesive residue
Your result with PROPHYflex:
Better treatment results, more satisfied patients

KaVo offers the perfect solution for each and every step of prophylaxis.

1. Workflow integration (e.g. with KaVo Primus® 1058 TM)
- Professional prophylaxis system and reliable treatment centre in one product
- Bracket table, swing-arm and cart version, with flexible equipment versions for all needs
- Comfortable patient positioning helped by soft upholstery
- Effective patient marketing with optional multi-media solution

2. Caries detection / imaging (e.g. with KaVo DIAGNOcam / X-ray)
- Clarity in all fields of application
- Reliable diagnosis of fissure and proximal caries
- Early detection of hidden caries
- Preservation and protection of healthy tooth tissue
- Pain-free detection
- Higher patient confidence levels due to reliable diagnosis

3. Dental plaque removal (e.g. with KaVo SONICflex quick 2008L)
- Easy and fast tip-change with just one turn
- One handpiece for an extremely broad spectrum of indications
- Gentle associations, especially for pain-sensitive patients
- Also compatible with Sirona couplings

4. Tooth cleaning sub- and supragingival (e.g. with KaVo PROPHYflex 3 – 2018)
- Tip rotates 360° for maximum visibility and ease of use
- Completely sterilisable
- Also compatible with Sirona couplings

5. Tooth polishing (e.g. with KaVo Prophy contra-angle handpiece 2953)
- Polishing paste sticks to polishing cup (no splashing of Prophy paste)
- Smaller head for better access
- Saliva is not pulled up on polisher
- Back-and-forth rotation by approx. 60°

6. Caries detection (e.g. with KaVo DIAGNOcam / DIAGNOdent)
- Clarity in all fields of application
- Reliable detection of fissure and proximal caries as well as calculus detection in pockets
- Early detection of hidden caries
- Preservation and protection of healthy tooth tissue
- Pain-free detection
- Higher patient confidence levels due to reliable diagnosis
