

# BRAVO

**W#AJM00C100A** Bravo17 (220-240V, 10A 50 Hz, Printer)

**W#AJP00C100A** Bravo17V (220-240V, 10A, 50Hz, Printer)

**W#AJG00C100A** Bravo21V (220-240V, 10A, 50Hz, Printer)

The new Bravo™ fractionated vacuum steriliser is available in 17 and 21 litre versions. The Bravo complies with the requirements of the latest standards for the sterilisation of unwrapped / wrapped hollow and solid instruments and porous loads. The Bravo comes as standard with internal water tanks (feed water and waste water), but can also be connected to a feed water purification system and to a direct-to-drain connection. The Bravo offers an easy to handle door mechanism and is equipped with a built-in printer. The Bravo can be supplied with an optional data logger or could alternatively be connected to a computer network.

#### Each Bravo includes:

Instrument Trays (3 for Bravo17, 5 for Bravo17V & Bravo21V), Stainless Steel Rack, Tray Extractor, Container (for adding distilled water), Extra Bacteriological Filter, Silicone Tube (for draining water), units equipped with a printer include a spare roll of printer paper.
